

**Marisa Horton**

Washington County

Me meeting the secretary of the county offices.

On our way to county offices!

# Meeting our register of deeds employees.

# Our gigantic room of county records!

Meeting County tax collectors.

About to enter where court fines are paid.

Me visiting the Geographic Information System and talking with the staff.

# Summary

I enjoyed touring the county offices. Our county manager was in a meeting so I was not able to meet with him. While visiting the register of deeds office, I was able to see all the records of birth, deaths, and marriages of Washington County there was a downward spiral staircase into the more records.

I was able to get on the online records and search my last name where I got to see my family's birth, death, and marriage records. I went into the office where you find out land property values. They call the office the Geographic Information System. Records dating back to the 1800's are not available because of a fire that occurred at the courthouse many years ago.
